[Established & Managed by National Health & Education Society]

DISCHARGE SUMMARY

Hs No : 192673

Adm. No : 68049

Date Of Birth : 02/12/1933

Bed No : 110A

Contact Phone No : 9819862685

Name : MRS CHANDER KOCHHAR

Age : 91 Years

DOA : 21/02/2025 08:41:00 PM

DOD : 24/02/2025 10:59:23 AM

Doctor : ABHAY RAUT

Diagnosis	ICD Code	ICD Description
BILATERAL POSTEROBASAL, INTERBOLAR SEGMENTAL AND SUBSEGMENTAL PULMONARY EMBOLISM IN RECENT RIGHT NECK OF FEMUR FRACTURE POST HEMIARTHROPLASTY (JAN 2025) HYPERTENSION EF:55%		
Clinical Summary: Patient was brought to the emergency with complaints of breathlessness, laboured breathing and drop of saturation at home - 70% on room air on 21/02/2025. Patient had History of 5 days postoperative to right bipolar hemiarthroplasty patient had fever, HRCT chest was done which was suggestive of small consolidation in the right lower lobe with GGOs= received injection TARGOCID and ERTAPENEM. Patient had on and off fever at home. Non-weight bearing. Standing since 1 week. Known case of hypertension, with surgical history of right hip bipolar hemiarthroplasty done on 08/01/2025. ICU SUMMARY:- 21/2/2025 to 23/02/2025 :- Patient was admitted to the ICU with the above said complaints. Routine investigations were sent which showed raised WBC count of 12000, CRP 85.9, raised d dimers (6.6), trop I' 352, serum creatinine 0.6. Patient was referred to Dr lancelet Pinto (pulmonology) ABG was done suggestive of type 1 respiratory failure with a D- dimer of 6.6, on further evaluating CTPA showed poster basal segmental Pulmonary Embolism, hence was started on LMWH and was later switched to oral Apixaban. Bilateral lower limb venous doppler done suggestive of no deep vein thrombosis. 2D echo 22/02/25 suggestive of normal LV, dilated LA, left ventricular ejection 55%, grade I LVDD, mild MR, mild AR, mild TR, no PAH, no clot/vegetation, no pericardial effusion. Fraction patient was stabilized and was maintaining saturation of 95% on room air. Ward Summary:- 23/02/2025 to 24/02/2025 Patient is now clinically stable with no more breathlessness. She is vitally and hemodynamically stable and can be discharged with the following advice.

** EXAMINATION** X RAY PORTABLE

** REPORT DETAILS **

Portable chest x-ray has been taken in AP view.

Significant rotation limits optimal evaluation.

Nasogastric tube is seen in situ.

Cardiomegaly is noted with unfolding of aorta.

Both the lung fields are clear.

Both costophrenic angles are clear.

Calcification of trachea is noted.

Compression of T10 vertebral body is noted.

Report Status: Validated /Dr. Praveen Jayaswal

**Dr. Praveen Jayaswal DMRD, MD.
CONSULTANT RADIOLOGIST**

NAME	: KOCHHAR CHANDER	AGE	: 91 YEARS	SEX	: FEMALE
HS NO.	: 192673	LOCATION	: 406	ADM NO.	: 68049
REFERRED BY	: DR. ABHAY RAUT	ORDER NO.	: 4116954	DATE	: 22/02/2025 *

ECHO WITH COLOR DOPPLER

- **Cardiac chamber dimensions** : LA(5.9 x 4.1cm) dilated. MPA - 2.5cm
Normal LV, RV, RA
- **Septae** : Intact
- **Structure of cardiac valves** : Sclerosed. Mitral Annular Calcification+
- **Wall motion abnormalities** : Absent at rest
- **LVEF** : 55%
- **RVEF (by TAPSE)** : (2.3cm), 50%
- **LV clot / vegetations** : Absent
- **Pericardial effusion** : Absent
- **IVC** : (1.2cm), Normal and >50% collapsing

Doppler function:

- Mitral E < A DT : 191 msec
- IVRT : 45 msec E at A = 0.8
- E/E prime : 17
- Pulmonary venous flow : Normal

CFM

- Flow across all Valves: Mild MR, AR, TR
- PASP by TR jet : 23 mmHg
- PAT : 97 msec
- AV gradient (Peak/Mean): 18/10 mmHg

COLOR DOPPLER PORTABLE

** REPORT DETAILS **

Bilateral lower limb venous color doppler study has been performed.

Both the common femoral and superficial femoral veins show evidence of normal color flow and venous waveform. No evidence of thrombus is seen. Phasic variation is noted. Compressibility and augmentation are present.

The popliteal vein and calf vein on both sides show evidence of normal color flow and venous waveform. Phasic variation is noted. No evidence of thrombus is seen. Compressibility is present.

CONCLUSION:

No evidence of deep venous thrombosis in current study.

Test performed by JMS on an emergency basis.

 Sample Type : CITRATED PLASMA

D-DIMER

Test	Result	Units	Status	Biological Reference Interval
D-DIMER	6.61	mg FEU / L	H	0 - 0.5

Immunoturbimetry

Comments : 1. Degree of D-dimer increase does not definitely correlate with the clinical severity of associated disease state.
 2. Increased levels have a high probability of Venous Thromboembolism (VTE) & require clinical correlation.
 3. Lipemia falsely decreases D-dimer levels.

TPA UNDERTAKING

Date: 22/02/2025

HS No. 192673

I, Mr./Mrs. MANU KOCHHAR a subscriber of _____
TPA / Insurance Co., under Dr. ABHAY LANT am fully aware of the following and would abide by them.

1. I am admitted on the basis of the authorization letter received from the TPA / Insurance Co., which is only a provisional authorization.
2. If the initial sanction amount is less than the admission / estimated deposit, I agree to pay the differential amount on admission.
3. In the absence of an authorization letter, I will be admitted as a 'cash paying patient' and I will pay the requisite deposit on admission & subsequently clear all interim / final hospital bills, as per hospital tariff/ policy.
4. In the event of an emergency admission, if authorization from the TPA / Insurance Co. is not received, I will be responsible for paying the hospital's bills.
5. I agree to pay all expenses pertaining to exclusions / non-medical charges as mentioned by the TPA / Insurance Co. would have to be paid by me.
6. I am aware that subsequent to the pre-authorization and admission, a request for confirmation of claim payable is sent to TPA / Insurance Co. and only on confirmation from TPA / Insurance Co., the patient will be treated as TPA patient (i.e. cashless facility).
7. In case if I undergo treatment for which the TPA / Insurance Co. withdraws authorization or rejects the claim, then I am liable to pay all the bills of the hospital.
8. I agree to pay a security deposit of Rs. 10,000/- as mentioned by their respective TPA / Insurance Co. The security deposit can be paid by cash / credit and debit card / pay order / RTGS / NEFT at the time of admission. The same will be refunded on settlement from TPA / Insurance Co. by RTGS only.
9. In case of refusal by TPA / Insurance Co. for cashless or reimbursement of claims of the patient, the hospital will not be responsible.
10. All original reports and original discharge card will be handed over to the TPA / Insurance Co. as per the requirement of the TPA / Insurance Co. Xerox copies of the reports and discharge summary will be given by the nursing department, where the patient is admitted in the ward.
11. The patient will be discharged only on receipt of the final approval from the TPA / Insurance Co. at the time of discharge and complete settlement of the bill.
12. The TPA / Insurance Co. may take approximately 04-05 hours or more to send the final approval on the day of discharge and this discharge process may take 06-08 hours. On the day of discharge, if discharge occurs between 11 am & 3 pm then half day bed charges will be applicable and from 3 pm onwards full day bed charges will be applicable. This will be irrespective of the final approval. If the TPA / Insurance Co. does not pay this bed charge, then the patient will have to pay the same.

DECLARATION BY THE PATIENT / REPRESENTATIVE

- I agree to allow the hospital to submit all original documents pertaining to hospitalization to the Insurer/T.P.A after the discharge. I agree to sign on the Final Bill & the Discharge Summary, before my discharge.
- Payment to hospital is governed by the terms and conditions of the policy. In case the Insurer/TPA is not liable to settle the hospital bill, I undertake to settle the bill as per the terms and conditions of the policy.
- All non-medical expenses and expenses not relevant to current hospitalization and the amounts over & above the limit authorized by the Insurer/T.P.A not governed by the terms and conditions of the policy will be paid by me.
- I hereby declare to abide by the terms and conditions of the policy and if at any time the facts disclosed by me are found to be false or incorrect I forfeit my claim and agree to indemnify the Insurer/T.P.A.
- I agree and understand that T.P.A is in no way warranting the service of the hospital & that the Insurer/TPA is in no way guaranteeing that the services provided by the hospital will be of a particular quality or standard.
- I hereby warrant the truth of the foregoing particulars in every respect and I agree that if I have made or shall make any false or untrue statement, suppression or concealment with respect to the claim, my right to claim reimbursement of the said expenses shall be absolutely forfeited.
- I agree to indemnify the hospital against all expenses incurred on my behalf, which are not reimbursed by the Insurer/TPA.
- I/We authorize Insurance Company/TPA to contact me/us through mobile/email for any update on this claim.

Date 22/2/2018Time 10:10

HOSPITAL DECLARATION

- We have no objection to any authorized TPA/Insurance Company official verifying documents pertaining to hospitalization.
- All valid original documents duly countersigned by the Insured/Patient/Representative of patients as per the checklist below will be sent to TPA/Insurance Company within 7 days of the patient's discharge.
- We agree that TPA/Insurance Company will not be liable to make the payment in the event of any discrepancy between the facts in this form and discharge summary or other documents.
- The patient declaration has been signed by the patient or by his representative in our presence.
- We agree to provide clarifications for the queries raised regarding this hospitalization and we take the sole responsibility for any delay in offering clarifications.
- We will abide by the terms and conditions agreed in the MOU.
- We confirm that no additional amount would be collected from the insured in excess of Agreed Package Rates except costs towards non-admissible amounts (including additional charges due to opting higher room rent than eligibility/choosing separate line of treatment which is not envisaged/considered in package).
- We confirm that no recoveries would be made from the deposit amount collected from the Insured except for costs towards non-admissible amounts (including additional charges due to opting higher room rent than eligibility/choosing separate line of treatment which is not envisaged/considered in package).

In the event of unauthorized recovery of any additional amount from the Insured in excess of Agreed Package Rates, the authorized TPA Insurance Company reserves the right to recover the same from us (the Network Provider) and/or take necessary action, as provided under the MOU or applicable laws.

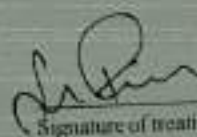

We confirm having read understood and agreed to the Declarations of this form

STAGES OF PRESSURE ULCERS :

Name : MANU KOCHHAR

Sign: Kochhar

Stage-1 : Erythema not resolving within 30 minutes of pressure relief.

Stage-2 : Partial thickness, loss of skin layer involving epidermis and penetration, but not through the dermis.

Stage-3 : Full thickness tissue loss extending through the dermis to involve subcutaneous tissue.

Stage-4 : Deep tissue destruction extending through subcutaneous tissue to fascia and may involve muscle layer, joint or bone.

"PREVENTION IS THE BEST TREATMENT"

IMAGING DEPARTMENT - PATIENT INFORMATION FORM

Dear Patient,

The following information is needed to help us to plan for your study.

1. Please list all the current medications you are taking medicine.

As per discharge file 4 emergency doc with PDH, K...

2. Are you currently taking oral diabetic drugs containing Metformin (Exmet SR, Metlong, Metaday, Glyciphage SR, Gluformin)

☐ Yes ☒ No

If you answer YES to any of these questions, Please inform the receptionist or Doctor.

3. Are you pregnant, or have you recently delivered a child?

☐ Not sure ☐ Yes ☒ No

4. Last Menstrual period

91 years
☐ Not sure ☐ Yes ☒ No

5. Are you currently breast feeding / nursing?

☐ Not sure ☐ Yes ☒ No

6. Have you eaten in the last 4 hours?

☐ Not sure ☐ Yes ☒ No

7. Have you had any barium exams in the last week?

☐ Yes ☒ No

8. Do you have any allergies to food or medicine?

☐ Yes ☒ No

If Yes, Please list :

9. Have you ever had an Radiological exam during which you received a contrast or dye injection?

DO NOT KNOW (DNR) FULL DETAILS

Yes No

Contrast related history

A. Allergy to iodine *(DNR)*

☐ Yes ☒ No

B. Allergy to seafood

☐ Yes ☒ No

C. Allergy to dust

☐ Yes ☒ No

D. Allergy to food

☐ Yes ☒ No

E. Allergy to Pollen/grain

☐ Yes ☒ No

F. H/O any family allergy

☐ Yes ☒ No

G. H/O any drug allergy

☐ Yes ☒ No

If you had any such examination, did you have any difficulty like *DNR*

☐ Nausea / Vomiting ☐ Flushing / Warmth ☐ Other difficulty :

10. Do you have any of the following conditions?

A. Bronchial Asthma

☐ Yes ☒ No

B. High Blood Pressure (Hypertension)

☐ Yes ☒ No

C. Diabetes Mellitus (High blood sugar)

☐ Yes ☒ No

D. Kidney dysfunction (creatinine greater than 1.4 mg/dl)

☐ Yes ☒ No

E. Sickle Cell Anemia

☐ Yes ☒ No

F. Multiple Myeloma (a disease of the bone marrow)

☐ Yes ☒ No

G. Pheochromocytoma (adrenal gland tumor associated with Hypertension).

☐ Yes ☒ No

11. Recent Blood Investigations :

Serum creatinine

File with regn blood 10 Hinderup, K...

CONSENT FOR CONTRAST MATERIAL INJECTION

Dear Patient,

Your name CHANDER KOLHAPUR Age _____ Weight _____ Male / Female _____

Your doctor has scheduled you for an x-ray examination that may require injection of a contrast agent in your blood stream. As you know, an x-ray is a picture of what is inside you. The contrast agent (also termed contrast media, or contrast material, or "x-ray dye") shows up white on ~~x-ray films~~ CT scan images and helps the radiologist interpret the ~~x-ray~~ CT scans. We use non-ionic contrast for all examinations and is very safe as compared to other ionic contrasts.

The contrast media is given through a small needle placed into a vein, usually on the elbow or on the back of your hand. Normally, contrast media is considered quite safe; however, any injection carries slight risk of harm including injury to a nerve, artery or vein, infection, or reaction to the material being injected. Occasionally, a patient will have a mild reaction to the contrast agent like nausea, vomiting, rash or itching. Uncommonly (one case in a thousand) a serious reaction to the contrast occurs like difficulty in breathing, respiratory arrest, cardiac arrest, fits or kidney dysfunction. Rarely, intravenous contrast can leak out from vein into soft tissue (incidence is 0.2 - 0.4%) and can cause skin discolouration, pain, numbness or death of tissue and very rarely requires surgery for the same. The physicians and staff of the hospital are trained to treat these reactions. Very rarely (1:75000) death has occurred related to contrast administration; the risk of such a severe consequence is similar to that from the administration of penicillin.

Certain patients are at higher risk for experiencing a reaction to the contrast agent.

Patients who are at higher risk for adverse effects of contrast are:

- 1) People who have already had a moderate or severe "allergic-like" reaction to contrast material which required treatment.
- 2) People severe allergies or asthma;
- 3) Patients with severe or incapacitating heart disease;
- 4) Patients with multiple myeloma, sickle cell disease, polycythemia, or pheochromocytoma.
- 5) Patients with severe kidney disease;
- 6) Diabetic patients;
- 7) Patients taking drugs injurious to kidney like cancer treatment drugs, lactic, Gentamycin

Kindly fill the Questionnaire form provided on the back to help us plan your study.

(Signed): Kolhapur Name: MAHAR KOLHAPUR Date: 21/2/25
CHANDER KOLHAPUR

Title of procedure contemplated : _____

I certify that I have been explained in the language I understand about the nature of my/the patients condition/disease and the nature of the procedure/operation to be performed and the benefits to be reasonably expected compared to alternative approaches and risks of the disease itself.

I have also been explained that in performing the procedure/operation he/she may use assistants such as hospital residents/other physicians/trained nurses and I consent to the same.

I state that I agree to get medical services in the form of _____ anaesthesia during the above mentioned procedure from any of the group of Anaesthesiology from the department of Anaesthesia of the Hospital. I do agree that I have been explained about the administration of anaesthesia & its nature, possible risks and complication.

"I have signed the Consent voluntarily out of my free will without any coercion and in my full senses."

Additional comments/risks explained if any:

I say that I have read the brochure and do understand the contents. I further state that I have been given an opportunity to ask questions and all my questions have been answered fully and to my satisfaction.

PATIENT INFORMATION GUIDELINES

Patient's Name: _____ Room No: _____

Date & Time: _____ Consultant Name: _____

Remark: _____ CCE Name: _____

Water & Uniform: _____ OTC: _____

General Rules & Information

1. Entry is restricted to pass holders only.
2. We provide Telephone Dialing facility for outgoing calls which is chargeable (Rs.5/- per minute).
3. Wi-Fi facility can be availed on one device, login to HHS -Wi-Fi. (6050). *HHK Patient will*
4. Children below 12 yrs. are restricted due to risk of infection.
5. Do not keep any valuables in the vehicle / room unattended. Smoking & Alcohol Consumption is strictly prohibited. (Hospital is not responsible for any loss or damage of valuables)
6. Check in and Check Out time is 11am to 11am.
7. During the patients stay in hospital room or ICU it is mandatory for one relative to accompany the patient for 24hours. (One 24 hours attendant pass will be issued at the time of admission. Visitors can utilize the 24 hours attendant pass on a rotation basis to meet the patient between 8:00 am to 8:00 pm for rooms & ICU 5.00 pm to 7.00 pm)
8. An amount of Rs. 500/- will be applicable as additional charges (Non Refundable) for ward key / ICU key and passes, if the key/Passes is not returned at the time of discharge / misplaced during the hospital stay.
9. Outside Food / Medicines / Linen / Water/ Crockery / Gifts / Flowers / Sweets / Toys / pillow/ bed sheet for patient/relative are strictly not permitted to be brought inside the hospital premises. Outside/Home food for relative is not permitted. Room service is available for the relative which is on chargeable basis.
10. Valet parking services are available 24x7 which is chargeable on the following basis: Per Hour – Rs.50/- 24 Hours– Rs.750/- (During the 24hrs parking valet cannot be removed within 24 hrs, otherwise charges will be applicable as per hourly basis.)
11. Parking is at owner's risk & kindly ensure that all occupants (including pets) are alighted before handover of vehicle for Valet parking.
12. Security checks would be done at regular intervals to ensure that there are no extra visitors. This is done keeping in mind the wellbeing of the patient.

For ICU:

1. During the patients stay in hospital room or ICU it is mandatory for one relative to accompany the patient for 24hours.
2. In case the patient is shifted to the ICU the room to be vacated & provision for relative will be arranged on the 3rd floor / 4th floor or 11th floor as per availability.
3. Facilities of meal for the relative of ICU patients only, is provided on Ground floor cafeteria on chargeable basis.

Food & Beverages

1. Eight veg meal services for patients are served complimentary for all room categories as per Dietician's approval. In case of any additional food requirement would be charged separately. **(Non-Veg meal is strictly prohibited from outside)**
2. Request for Jain meals for patients (to dietician) / relatives (to pantry) should be made in advance.
3. Four veg meal services only for **one** attendant of **Suite / Premium Deluxe** class are complimentary. Any food item ordered from room service menu will be chargeable.
4. For Daycare patient two veg meal services for patients are served complimentary as per Dietician's approval. In case of any additional food requirement would be charged separately.
5. **Room service facility** is available for the relatives of patients admitted in the room.
6. **We strictly prohibit outside food to ensure patients speedy recovery & wellness. (Under no circumstances outside food & beverage will be allowed for patient or relative).**

EXTN NO: Pantry - 6630 / 6631

Dietician - 6635 (7 am To 7 pm)

Patient Meal Timings : (Request to consume meals within 15mins after service)

Sr.No.	Patient Meal	Timings
1	Early Morning Tea	6:00 a.m - 6:30 a.m
2	Breakfast	7:45 a.m - 8:30 a.m
3	Soup	11:30 a.m - 12:15 p.m
4	Lunch	12:30 p.m - 1:30 p.m
5	Evening snacks	4:00 p.m - 4:30 p.m
6	Soup	6:00 p.m - 7:00 p.m
7	Dinner	7:30 p.m - 8:30 p.m
8	Milk	9:00 p.m- 9:30 pm

Discharge & Refund

7. Discharge procedure will take approximately **2hrs** after Doctors Consultation and written instruction (May vary from case to case). For TPA discharges, it would take upto **5-6 hours** depending on the final approval from the TPA.
8. At the time of discharge, passes should be surrendered to the discharge counter.
9. Original Bill Summary, Detailed Bill and Settlement copy will be given from the billing counter. Medicines, Reports and Discharge Summary will be handed over by the nurse on duty.

EXTN NO: TPA: - 6035, Cashier: - 6040.

Billing - 6031, Admission - 6032

Grievance Registration: In case of any feedback, suggestions and grievance regarding the services, Patient/Relative can inform the Customer Care Department on:

EXT 6060 or 8879001656

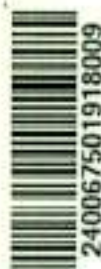

EMAIL ID - customercare.khar@hindujahospital.com

Customer care working hours (7 am to 10 pm)

Please note patient information guidelines are subject to change without prior notice.

PID NO: P27224542522161

Age: 91 Year(s) Sex: Female

Reference: DR.JIMMY LALAKA

Sample Collected At:

Holy Family Hospital

St Andrews Road, Hill Road, Bandra [w].

Processing Location:- Metropolis

Healthcare Ltd, Unit No409-416, 4th

Floor, Commercial Building-1, Kohnoor

Mall, Mumbai-70

VID: 240067501918009

Registered On:

17/03/2025 03:57 PM

Collected On:

17/03/2025 3:56 PM

Reported On:

20/03/2025 10:26 PM

Investigation	Observed Value	Unit	Biological Reference Interval
AChR (Acetyl Choline Receptor) Antibodies (Serum, Enzyme Immunoassay (EIA))	8.8	nmol/L	Negative: < 0.40 Borderline: 0.40-0.50 Positive: > 0.50

Medical Remarks: Rechecked in dilution. In view of high value suggesting correlation with clinical history.

Interpretation:

- Positive result indicates possibility of Myasthenia Gravis (MG) in people who are symptomatic.
- These antibodies can also be found in some other disorders like- primary biliary cirrhosis, tardive dyskinesia, autoimmune thyroiditis, systemic lupus erythematosus, thymoma without myasthenia, and amyotrophic lateral sclerosis.

Clinical Utility:

- Acetyl Choline Receptor Autoantibodies is highly specific for the diagnosis of Myasthenia Gravis (MG).
- In the majority of patients (~85%) antibodies against the muscle acetylcholine receptor (AChR) are detected, while 6% antibodies against the muscle-specific kinase (MuSK) are detected.
- In approximately 10% of MG patients no autoantibodies can be found with the classical diagnostics for AChR and MuSK antibodies.
- The antibody titres can be negative or not detectable in the first 12 months after the onset of symptoms of MG or during immunosuppressant therapy.
- The magnitude of the antibody titres correlates poorly with severity of MG and hence is not useful for predicting disease activity.

Note:-, Positivity is observed in a few cases post covid due to molecular mimicry.

Associated Test: Musk Antibody (M0080)

Reported On:

20/03/2025 10:26 PM

Investigation	Observed Value	Unit	Biological Reference Interval
---------------	----------------	------	-------------------------------

Interpretation:

- Antibodies against striated muscles (MuSK Antibody) - Muscle-specific receptor tyrosine kinase. are found in 37% of patients with Myasthenia gravis who are seronegative for Anti-AChR.

Clinical Utility:

- MUSK Antibodies aid in the diagnosis and clinical management of Myasthenia Gravis, a neuromuscular disease.

Associated Test:

- Myasthenia Gravis Profile(M0081), AChR Antibodies Acetyl Choline Receptor Antibodies (A0012), Clustered AchR and MuSK and LRP4 Antibodies (C0343).
