PROFILE

Motivated AIML student in CSE with hands-on experience in Deep Learning, Computer Vision, and Decentralized Systems. Proficient in architecting deployable AI solutions using modern frameworks, containerization (Docker/Kubernetes), and embedded hardware. Strong problem-solver focused on bridging the gap between intelligent models and secure, scalable real-world implementations.

EXPERIENCE

Rashi Peripherals Limited

08 Jul '25 – 08 Aug '25

Machine Learning(LLM/SLM) Intern — Bangalore, India

- Developed and deployed an ASR (Automated Speech Recognition) model on Jetson Orin for real-time implementation.
- Managed the deployment of computer vision projects like Hump detection and Object classification on Jetson Nano.
- Demonstrated strong technical problem-solving, collaboration, and rapid learning skills during the tenure.

PROJECTS

SoilChain (Team Lead)

Apr '26

MobileNetV2, FastAPI, Polygon (Blockchain), Docker

- Developed a hybrid soil health analysis system fusing MobileNetV2 visual classification with IoT sensor data (NPK, pH, Moisture).
- Engineered a weighted scoring algorithm (40% CNN / 60% Sensor) to automate SoilToken rewards on the Polygon network.
- Containerized the entire backend using Docker to ensure consistent deployment environments for ML inference.

DeepTrust (Team Lead)

Mar '26

CNN, RNN, LSTM, Deep Learning

- Led a team in developing a deepfake detection model using advanced deep learning architectures.
- Achieved a peak evaluation accuracy of 99.74% through rigorous model training and optimization.

Disaster Lens

Oct '25 – Nov '25

Llama3, LLaVA, Social Media APIs

- Directed the automation of social media data processing to extract and verify critical disaster-related information.
- Implemented a custom de-duplication system using Llama3 and LLaVA to deliver consolidated real-time alerts.

PDF-Based RAG QA System

Jul '25

Ollama, Tesseract, ChromaDB

- Built an intelligent Document QA system using Multi-Modal understanding for complex data extraction.
- Integrated Hugging Face Embeddings (MiniLM) and Chroma Vector DB to ensure high-accuracy question answering.

EDUCATION

Dayananda Sagar University

2023 – 2027 (Current)

Bachelor of Technology in Computer Science (AI & ML) — Bengaluru, India

- Academic Standing: Recognized for consistent academic excellence with a CGPA of 9.03.
- Relevant Coursework: Artificial Intelligence, Machine Learning, Data Structures, and Algorithms.

Narayana PU College

2021 – 2023

12th Grade - PCMB (Score: 79.2%) — Bengaluru, India

Harward International School

2021

10th Grade (Score: 89.4%) — Bengaluru, India

SKILLS & CERTIFICATIONS

Technical: SQL, Python, Java, Machine Learning, NLP, Computer Vision, Prompt Engineering, RAG ,Data Handling & Cleaning, Feature Engineering,

Cloud & AI Platforms: AWS Bedrock, Amazon Bedrock AgentCore, Strands Agents SDK, Vibe Coding

DevOps & Tools: Docker, Git, GITHUB, Kubernetes, MLflow, Jetson Nano/Orin, Tableau, Power BI

Certifications: Deep Learning Specialization (Coursera), NPTEL Deep Learning, Certified Ethical Hacker (EC Council)

ACHIEVEMENTS

- Won 4th Prize as Team Lead in Techflix LA De Costa, a National Level Hackathon hosted at college.
- College representative in Smart India Hackathon (SIH).
